Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-13, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Katsumura et al. (Katsumura) (6,307,826).

Katsumura discloses a method of fabricating a device comprising exposing a part of resist layer on a substrate and applying an elective field across the resist, the direction of the field being substantially perpendicular to a plane of the resist layer during the exposing (col. 5, line 33 – col. 6, line 8). Katsumura also discloses providing a layer of conductive material (4b) of metal on a lower surface of the resist (4c) and applying elective field by connecting layer of conductive material to a fixed potential (Fig. 2B).

Claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by Viscor et al. (Viscor) (2004,0256579).

Viscor discloses a lithographic apparatus comprising illumination system (para 0003), a support structure for patterning device (102), a substrate table (120), a projection system (114),

an electric field generator (para 0027) to apply an electric field across a resist layer, the direction of the field being perpendicular to the plane of the resist layer.
